

# Data Analytics

## The Challenge.

The Navy Supply Systems Command (NAVSUP) required quality, real-time data to make informed logistics and financial decisions. Although it had migrated to a commercial, highly integrated Enterprise Resource Planning (ERP) system, significant data remained in non-integrated legacy systems. The Business Systems Center (BSC) had designed an exportable, user-defined, self-service - Navy Business Intelligence Services (NBIS) that provided near-real time visibility of data for decision-making. However, it lacked a **qualified contractor with appropriate contract vehicle** to keep the project on track.

## Experience and Qualifications.

Pundir Group was able to step in and, using its 8(a) status, put a contract in place quickly. It brought extensive knowledge and experience in the critical areas of ERP systems integration, IBM PureData analytics (NETEZZA) platform, SAS, COGNOS, dash-boarding, performance measure development and data analytics.

## The Approach

BSC contracted Pundir Group to sustain the current environment and build upon the NBIS foundation to add system improvements as the Navy transitions to a shared data analytics platform. Pundir group has added additional data sources, is developing an automatic identity management system for better user provisioning, and is transitioning BSC's Authority to Operate based on the outdated DoD Information Assurance Certification and Accreditation Process (DIACAP) requirements to the latest Risk Management Framework (RMF) IT security requirements.

## FINAL RESULTS

NAVSUP BSC was able to continue developing NBIS without program delays. It is deploying NBIS to Navy-wide customers, helping them make better, more informed business decisions in real time. Requirements for RMF accreditation have been completed and full certification is now pending.

## Services

- Building Commissioning
- Energy Benchmarking & Audits
- Facility Condition Assessments
- Budgeting and Forecasting
- Customized Data Analytics

## Staff Differentiators

- 45+ Years of Experience
- Licensed Professional Engineers
- Commissioning Certifications
- Performance-Based Processes
- Integrated Solutions Teams
- Client Relationship Management
- Strategic Mix of Technology and Business

## Pundir Group's Clients:

- Make informed, data-driven decisions
- Reduce O&M and energy costs
- Improve occupant comfort and productivity
- Minimize unexpected breakdowns
- Enhance equipment lifecycle
- Augment in-house O&M and Engineering staff expertise
- Comply with federal, state and local ordinances

## Past Performance

- W9132T-17-P-0030 (US Army)
- N00189-17-P-Q006 (US Navy)
- GS-11-P-15-YE-C-7001\*

## NAICS Codes

541519: IT Value Added Resellers  
541511: Computer Programming  
541350: Building Inspection Services  
541620: Environmental Consulting  
541611: Admin Management and Consulting Services
